Professional Headline

Data Analyst | Program Officer | Case Manager | Skilled in Python, Data Structures & Community Development | 5+ Years in Humanitarian & Social Impact Roles

Professional Summary

Passionate and data-driven professional with over 7 years of experience in program implementation, case management, and community development. I bring a unique blend of technical and humanitarian expertise, having supported vulnerable populations through data analysis, economic strengthening initiatives, and psychosocial services.

Currently interning as a Data Analyst, I apply my skills in Python and data structures to extract insights and support informed decision-making. My work with organizations like Catholic Relief Services and First Step Action has equipped me with hands-on experience in monitoring, evaluation, and field coordination.

I'm deeply committed to using data for social impact, particularly in health, education, and economic empowerment programs. Whether working onsite or remotely, I thrive in roles that combine compassion with evidence-based solutions.

Core Skills

- Python Programming & Data Structures
- Case Management & Community Linkages
- Program Design & Implementation
- Monitoring & Evaluation (M&E)
